```sql
--DATA MANIPULATION -modify data inasie the database
--1.INSERT
        -- it can add data to empty tables and also already existing tables

INSERT INTO customers(id,first_name,country,score)
VALUES (11,'shawn','germany',null),
        (12,'sam','uk',null)
SELECT *
from customers

 --rule: no.of values and columns must match and columns & values must be in the same order
-- INSERT using SELECT

--copy data from customers table into persons
INSERT INTO persons(id,person_name,birth_date,phone)
SELECT
    id,
    first_name,
    null,
    'unknown'
FROM customers
select *
from persons

-- UPDATE
 -- change the score of customer 6 to 0*/
 UPDATE customers
 SET score=0
 WHERE id=6
 select * from customers
 where id =6

 /* change the score of customer 10 to0
  and update the country to uk*/
  UPDATE customers
  SET score =0,
     country = 'uk'
  WHERE id = 10
 select * from customers
  /* update all customers with NULL score
   by setting their score to 0*/
   UPDATE customers
  SET score =0
  WHERE score is NULL
SELECT *
FROM customers

```

```
49  -- DELETE
50
51    /* delete all customers with an id greater thann 5*/
52    DELETE FROM customers
53    WHERE id>5
54
55    select *
56    from customers
57
58    /*delete all data from table persons*/
59    DELETE FROM persons
```
